

Amendments to the Specification:

Please replace the paragraph beginning at page 7, line 1 with the following amended paragraph.

Various high-level software application ~~programmer-programming~~ interfaces (APIs) have been established to create a scene graph when presented with the scene graph display commands. For example Java3D and VRML provide high-level software to generate a scene graph. Lower level APIs have also been provided, including Open GL, and Direct 3D. Application software, for example computer games, has been developed to provide the scene graph display command to the API.
